

Evgeny Ignatik

Senior Software Engineer

Berlin, Germany

+4915140012295 evg.ignatik@gmail.com <https://eignatik.space>

Education

Polytechnic University College
"Radiopolytech" 2015,

Information Systems Engineer

Peter the Great St. Petersburg
Polytechnic University, 2019,

B.Sc. Software Engineering, ICST

Key specialities

Java, Kotlin, Spring/Guice,
Hibernate; JavaScript, Dart,
React.js, Angular, HTML, CSS;
SQL;

Other

C/C++, C#, Gradle, Maven,
Spanner, neo4j, Cassandra,
GCP, MS Azure, Docker

Languages

English - Advanced (C1)

Polish - Intermediate (B1)

Russian - Native

German - A1-A2

My projects

Fire of our souls [2021-Present]

Game development project.

Lingua Strive [Jan 2020 - Oct 2020]

Flexible dictionaries for languages.

PetPool [Jul 2019 - Oct 2019]

Find temporal homes for animals.

Online webinars [2018 - 2019]

Conducting webinars: Java and
Web Development.

LOAD.X [2016 - 2019]

Light tool for load testing.

Summary

A software engineer, B.Sc in Engineering, with 5 years of commercial experience and 7+ years of technical background. I'm passionate about coding, learning, team work. I prefer challenging tasks. I always care about code quality, performance, and product quality as well. Experienced in areas like retail, banking (both retail and investment), supply chain management, inventory, testing.

What inspires me? An opportunity to make an impact.

Work experience

August 2021 - Present

Senior Software Engineer at Delivery Hero SE

July 2019 - August 2021

Senior Software Engineer & RM at EPAM SYSTEMS Poland

July 2018 - July 2019

Senior Software Engineer at Luxoft Poland

October 2017 - May 2018

Software Engineer at Sberbank-Technologies Russia

January 2017 - October 2017

Software Engineer at Reksoft Ltd. Russia

July 2016 - December 2016

Junior Java Developer at Biomedis Online Project Russia

June 2016 - July 2016

Intern Java Developer at Impuls Ltd. Russia

June 2015 - March 2016

Front-End Developer Self-Employed Russia

May 2015 - June 2016

Trainee Android Developer AkvaTest Ltd. Russia

Achievements.

- Implemented loading tests tool to hold up to 100 000 requests in the processing and submit around 2000 requests per second
- Designed channels to distribute data in complex distribution systems
- Managed a unit of 6 engineers
- Created technical documentation and proposed architecture documents
- Conducted online webinars during six months for young developers: Java, JavaScript, HTML, CSS
- Created a pet project for a group of young back-end and front-end engineers, led the project, designed, managed development, and mentored engineers
- Acquired a technical-interviewer certificate
- Conducted more than 100 job interviews
- Conducted tech-talks for colleagues
- Optimised CI pipeline speed by two times by refactoring tests suits
- Mentored fresh colleagues
- Migrated an application from ListenableFuture to Promises
